

AFS FITTINGS

AFS DIFFUSERS (ANEMOSTAT)

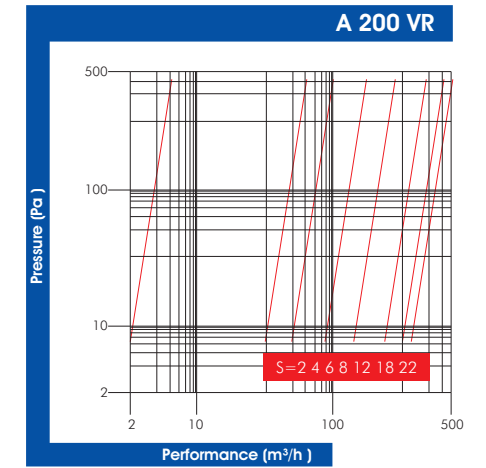

AFS DIFFUSERS are specially designed vents for use in low and medium pressure heating, cooling, ventilation and air conditioning systems. They are equally suitable for use as inlets or outlets.

AFS DIFFUSERS have adjustable airflow and are manufactured from white ABS with a polypropylene mounting flange and lock ring that allows screw-free installation.

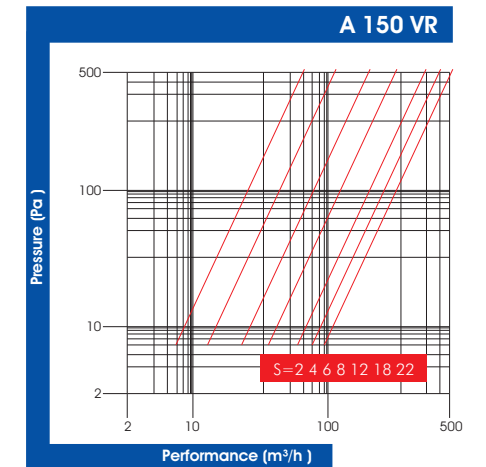

- Suitable for air distribution or extraction systems
- Variable airflow
- Suitable for wall or suspended ceiling installation
- Practical and quick installation facilitated by mounting flange and lock ring.
- Screw-free installation
- Airtight seal
