

VINYLAFS-WHITE
PVC INDUSTRIAL FLEXIBLE AIR DUCTS
AIR DUCTS

VINYLAFS series of industrial flexible PVC ducts are multi-purpose non-insulated flexible air ducts that are suitable for low and medium pressure heating, cooling, ventilation and air conditioning systems. VINYLAFS series of industrial flexible PVC ducts can be used in the systems required excessive vibration and perpetual activeness. VINYLAFS-WHITE non-insulated PVC flexible air ducts are made of PVC strips reinforced with high tension spiral steel wire. VINYLAFS series of non-insulated industrial PVC flexible air ducts are airtight. VINYLAFS series of industrial flexible PVC ducts are highly elastic, flexible and can be compressed. They can be fitted to circular, oval or rectangular connectors.

TECHNICAL PROPERTIES

	VINYLAFS- WHITE
Construction	PVC
Nominal Thickness	90 micron
Available Diameters	Ø 82 mm - Ø 203 mm
Temperature Range	- 20 °C / + 70 °C
Air Velocity	30 m/s (Max.)
Operating Pressure	2000 Pa (Max.)
Standard Length	10 m.
